Multilingual Services in the Legal Field

At **Language Services Associates**, we understand that legal interpretation and translation requires more in-depth talents and qualifications than language fluency. Our linguists have advanced degrees, accreditations and certification credentials for specialized work within law firms, healthcare, and the court system. In addition to these accomplishments, our staff has extensive industry-specific expertise, often coupled with Law or paralegal degrees. They understand the need for complete confidentiality, quick turnaround, and compliance with court requirements. Providing on-location and telephonic interpreting as well as document translation, LSA has served the legal field in the most professional and efficient manner since 1991.

We offer a full range of services that aid you in addressing demanding multilingual legal challenges such as:
